SCP Series Solar Powered Centrifugal Pool Pumps With Brushless DC Motors

CMP Series

SunPumps SCP series solar powered centrifugal pool pumps with brushless DC motors are the ultimate in performance and reliability. There are two types to choose from, the CMP series with a 2" outlet and the HV series with a 2 ½" outlet.

SCP series pool pumps will replace almost any AC powered pool pump up to 2 HP and because they get their power from the sun, you will never have an electric bill.

The Sensorless Brushless DC Motors are the ultimate in efficiency, performance and reliability. Designed specifically for solar applications, these motors are less than half the size and weight of a conventional brush type motor and will provide years of trouble free service.

HV Series

PCC Series
Brushless
Controller

56J
Brushless DC Motor

The SCP series pump are single stage centrifugals constructed from high performance thermoplastic. They are extremely resistant to mineral and algae deposits while providing outstanding strength and durability. For added protection there is a basket strainer incorporated into the suction side of the pump. Simplicity is a key feature of the SCP series pumps. They are simple to install and field servicing is easily accomplished without the use of specialized tools.

SunPumps SCP series pumps can not only be used for pool water filtration, but for fountains, water features, pond aeration, circulating water for aqua culture or to irrigate small farms. They were designed for use as a stand-alone water delivery system. There is no better way to provide water for remote homes, villages, small farms as well as many other needs beyond commercial grid power. SunPumps high-quality manufacturing make the SCP series pumps the ultimate in solar powered pool pumps.
